

CARBON REDUCTION PLAN

Supplier Name: Provepharm UK Ltd

Publication date : 7th December 2024

Commitment to achieving Net Zero

Provepharm UK Ltd is committed to achieving a Net Zero emissions by 2050.

Baseline Emissions Footprint

Provepharm UK Ltd, created in 2023, is a subsidiary of Provepharm Life Solutions based in 22, rue Marc Donadille — 13013 Marseille — France.

Provepharm Life Solution, the parent company, carried out its first carbon assessment in 2022 (based on 2021 data) in accordance with the ACT (Assessing Low Carbon Transition) method which has been developed by the French environmental agency ADEME¹ and the Carbon Disclosure Project² (CDP). The Carbon footprint covered scopes 1, 2 and 3 for all its activities and subsidiaries existing in 2021.

This first approach of the carbon emissions assessment included a consolidation of data based on two levels of analysis:

- Support functions
- Production of one kg of API (Active Pharmaceutical Ingredient)

This carbon assessment is complemented by a comprehensive emissions reduction plan covering the period from 2022 to 2030.

Baseline year : 2021

Details relating to the baseline Emissions Calculations:

The data related to Provepharm Life Solutions disclosed In the present document were establish, as mentioned in the previous paragraph, in 2022.

According to the establishment of the subsidiary, Provepharm UK Ltd, in November 2023 - the bidding entity, and in order to be aligned with our environmental commitments, Provepharm Life Solutions will conduct a new carbon emissions assessment in 2025 (based on 2024 data).

This assessment will serve as the baseline year for a 2025–2050 carbon reduction plan for the reasons as followed:

- Establishing a carbon footprint for Provepharm UK Ltd. that allows Provepharm Life Solutions to respond efficiently to the NHS's demand for annual carbon assessment.
- Providing more recent and relevant data due to recent involvement in medication carbon footprint assessments.

Baseline year emissions 2021	
Emissions	tCO ₂ e
Scope 1	32
Scope 2	86
Scope 3	8526
TOTAL EMISSIONS	8642

Current Emissions Reporting (2021)	
Emissions	tCO ₂ e
Scope 1	32
Scope 2	86
Scope 3	8526
TOTAL EMISSIONS	8642

Emissions reduction targets

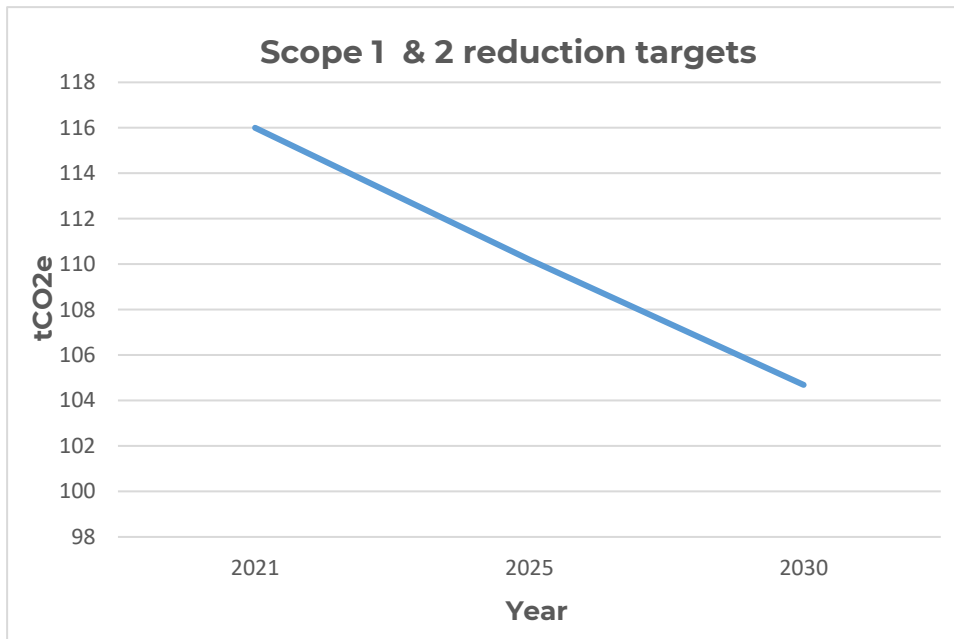

In order to continue our progress to achieving Net Zero, we have adopted the following carbon reduction plan from 2022 to 2030.

According to Provepharm Life Solutions' actual reduction plan, we project that carbon emissions will decrease over the next five years to 1000 tCO₂e by 2030. This is a reduction of 11.5%.

This targets will be updated to be aligned within the course of the year 2025 to respond to a carbon reduction plan 2025-2050.

[Progress against these targets can be seen in the graph below:](#)

Scope 1& 2 (absolute value): based on SBT SDS trajectory

Scope 3 (absolute value): based on Sectorial IEA NZE trajectory

Carbon reduction projects

The following environmental management measures and projects have been completed or implemented since the 2021 baseline:

- Change of energy supplier to sustainable energy (wind turbine),
- A project of several years has been implemented on our supply chain to switch as much as possible from air freight to sea freight,
- An analysis of our site waste has been conducted to enable energy conversion that reduces our carbon emissions from waste.

These recent implementations will be assessed within the course of 2025 to be able to disclose our effective carbon emissions reduction from 2021 to 2025.

Declaration and Sign Off

This Carbon Reduction Plan has been completed in accordance with PPN 06/21 and associated guidance and reporting standard for Carbon Reduction Plans.

Emissions have been reported and recorded in accordance with the published reporting standard for Carbon Reduction Plans and the GHG Reporting Protocol corporate standard 3 and uses the appropriate Government emission conversion factors for greenhouse gas company reporting 4.

Scope 1 and Scope 2 emissions have been reported in accordance with SECR requirements, and the required subset of Scope 3 emissions have been reported in accordance with the published reporting standard for Carbon Reduction Plans and the Corporate Value Chain (Scope 3) Standard⁵.

This Carbon Reduction Plan has been reviewed and signed off by the board of directors (or equivalent management body).

Signed on behalf of the Supplier:

3rd December 2024,

Richard VACHER DETOURNIERE
